

# Solutions for atypical parcels

## What is an atypical parcel?

An atypical parcel is one which is difficult to handle. In particular due to the fact that it exceeds the permitted dimensions or weight, one which does not have a regular shape, is inadequately packed, or cannot be sorted on an automatic line.

## CLASSIFICATION OF PARCELS

### Standard parcela

- maximum parcel dimensions 120 x 60 x 60 cm
- sum of circumference and length at most 360 cm
- maximum weight 31.5 kg
- cardboard box in the shape of a cube or a block (can be protected with foil)

### Atypical parcel

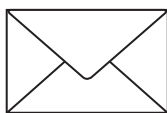

- one side of the parcel is longer than the maximum permitted dimension
- maximum length of one side 200 cm
- inadequately packed parcels
- parcels with a distinctly irregular shape
- car and motorcycle tyres

### PPL Parcel Max+ parcels submitted for forwarding on pallets

- length of longest side more than 200 cm
- sum of circumference and length more than 360 cm
- weight more than 50 kg
- car and motorcycle tyres larger than the permitted size and quantity (see atypical types of parcels)

## EXCEPTIONS

### Parcels which are not classified as atypical parcels

- envelopes and parcels in a bag (max. 60 x 40 x 36 cm, 3kg)
- compact bundle of at most two regular shaped parcels, regardless of their different sizes, with a solid base

## CORRECTLY PACKED PARCEL

### Packing parcels

- proper packing will better protect your parcel against damage (for more details, see [www.ppl.cz](http://www.ppl.cz))
- in addition to this, you enable us faster and safer handling and avoid the risk of surcharges for atypical parcels
